As a result of higher interest rates, there was a \$15.8 million decrease in gain on sale of loans, in the first quarter of 2018 as compared to the first quarter of 2017. Origination volume declined 16% in the first quarter of 2018 to \$1.3 billion, as compared to the first quarter of 2017, and gain on sale margins declined to 163 bps from 236 bps.

The decrease in originations from the first quarter of 2018 was primarily a result of higher interest rates. From January 2017 through the first quarter of 2018, interest rates have increased 100 bps from the historically low interest rate environment of previous years, causing a sharp drop in refinance volume.

Partially offsetting the decline in gain on sale revenues was an increase in servicing fees, net, and a mark-to-market gain on mortgage servicing rights ("MSRs"), as well as a decrease in operating expenses.

Personnel expense decreased 29%, or \$7.2 million, to \$17.7 million for the first quarter of 2018. The decrease is primarily related to a reduction in commission expense due to a decrease in loan originations as well as staff reductions made in late 2017 and early 2018. As we continue to more closely align operating and staffing levels to origination volumes, we will continue to right size the organization.

### Servicing Portfolio Data

(in millions)

	<b>As of March 31, 2018</b>	<b>As of December 31, 2017</b>	<b>% Change</b>	<b>As of March 31, 2017</b>	<b>% Change</b>
Mortgage Servicing Portfolio (UPB)	\$16,751.8	\$16,330.1	3%	\$13,241.9	27%
Mortgage Servicing Rights	\$174.1	\$154.4	13%	\$141.6	23%
	<b>Q1 2018</b>	<b>Q4 2017</b>	<b>% Change</b>	<b>Q1 2017</b>	<b>% Change</b>
Servicing Fees, Net	\$9.5	\$8.3	14%	\$7.3	30%

The mortgage servicing portfolio increased to \$16.8 billion at March 31, 2018 as compared to \$13.2 billion at March 31, 2017. The increase was due to a shift in our strategy in 2016 to retain our mortgage servicing as well as initiating a retention program to recapture portfolio runoff during the low interest rate environment. During 2018, we have continued with our strategy of growing the mortgage servicing portfolio. As a result, the unpaid principal balance ("UPB") of our mortgage servicing portfolio increased 27% to \$16.8 billion at March 31, 2018 compared to March 31, 2017. Delinquencies within the servicing portfolio have decreased slightly and remain low at 0.72% for 60+ days delinquent as of March 31, 2018 as compared to 0.81% as of December 31, 2017.

The servicing portfolio generated net servicing income of \$9.5 million in the first quarter of 2018, a 30% increase over the net servicing fees of \$7.3 million in the first quarter of 2017.

For the quarter, ended March 31, 2018, gain on MSRs was \$7.7 million compared to a loss of \$977 thousand for the quarter ended March 31, 2017. The gain on MSRs in the first quarter was primarily the result of higher interest rates resulting in an increase in the fair value of MSRs.

Mr. George Mangiaracina, President of Impac Mortgage Holdings, Inc., stated, "The mortgage origination industry continued to face strong headwinds in the first quarter of 2018, challenged by a flattening yield curve and rising rate environment. Originators have experienced reduced origination volume at compressed gain-on-sale margins, as capacity exceeded demand. Our origination business is not immune to these market conditions, however, our mortgage servicing portfolio served as a counter cyclical balance to our first quarter results. The mortgage servicing portfolio provided the Company with liquidity and GAAP earnings from the income and mark-to-market gain."

### Non-GAAP Financial Measures
