Net (loss) earnings as well as adjusted operating (loss) income for the third quarter of 2018 decreased due to a decline in revenue from gain on sale of loans, net as a result of a decrease in origination volumes as well as a reduction in margins. Gain on sale margins decreased by 44 basis point (bps) to 160 bps in the third quarter of 2018, as compared to 204 bps in the third quarter of 2017 reflecting margin compression.

As part of the CCM acquisition in 2015, we recorded goodwill of \$104.6 million, which is evaluated on a quarterly basis for impairment. As previously

reported in the second quarter of 2018, an impairment charge of \$74.7 million related to goodwill and \$13.4 million related to intangible assets, was recorded as a significant reduction in the anticipated future cash flows and estimated fair value for this reporting unit had occurred. During the third quarter of 2018, CCM continued to experience a significant decline in origination volume and margin compression that exceeded our updated projections from the second quarter of 2018. As a result, during the three months ended September 30, 2018, we recorded an impairment charge of \$29.9 million related to goodwill and \$4.9 million related to intangible assets. Despite full impairment of goodwill, the consumer direct channel will remain an integral component of the Company's distribution capabilities going forward.

Personnel expense decreased \$7.0 million to \$16.1 million for the three months ended September 30, 2018 as compared to the same period in 2017. The decrease is primarily related to a reduction in commission expense due to a decrease in loan origination volumes as well as staff reductions in the first three quarters of 2018. As a result of the reduction in loan origination volumes, we continue to reduce overhead to more closely align staffing levels to origination volumes in the current economic environment. As a result of the staff reductions in the third quarter of 2018, average headcount decreased 26% for the third quarter of 2018 as compared to the same period in 2017. Offsetting the decrease in personnel expense was \$1.1 million in severance costs associated with the repositioning of the staff and executive management team.

	Q3 2010	Q2 2010	Change	Q3 2017	Change
Servicing Fees, Net	\$10.1	\$9.9	3%	\$8.5	19%

The mortgage servicing portfolio remained flat at \$16.8 billion at September 30, 2018 as compared to June 30, 2018 but increased from \$15.7 billion at September 30, 2017. During the three months ended September 30, 2018, the mortgage servicing portfolio increased due to servicing retained loans sales of \$570.5 million in UPB, which were slightly offset by prepayments and principal amortization from the servicing portfolio. In October 2018, the Company sold \$3.4 billion in unpaid principal balance (UPB) of GNMA mortgage servicing rights (MSRs) for approximately \$35.9 million.

The servicing portfolio generated net servicing income of \$10.1 million in the third quarter of 2018, a 19% increase over the net servicing fees of \$8.5 million in the third quarter of 2017.

For the three months ended September 30, 2018, we recorded a \$5.2 million loss from MSRs, net compared to a loss of \$10.5 million in the comparable 2017 period. For the three months ended September 30, 2018, we recorded a \$5.4 million loss from a change in fair value of MSRs primarily due to changes in fair value associated with voluntary and scheduled prepayments partially offset by changes in market rates, inputs and assumptions. Included in the \$841 thousand gain from changes in valuation market rates, inputs or assumptions was a \$2.3 million decrease in fair value associated with the execution price to sell \$3.4 billion of our GNMA mortgage servicing portfolio during the three months ended September 30, 2018

Delinquencies within the servicing portfolio have remained low at 0.98% for 60+ days delinquent as of September 30, 2018 as compared to 0.81% at December 31, 2017.

Origination Data

	Q3 2018	Q2 2018	% Change	Q3 2017	% Change
Retail Originations	\$432.7	\$459.9	-6%	\$1,426.2	-70%
Correspondent Originations	\$200.6	\$374.9	-46%	\$376.4	-47%

Total Originations	\$853.2	\$1.034.2	-18%	\$2.084.3	-59%

During the third quarter of 2018, total originations decreased 18% to \$0.9 billion as compared to \$1 billion in the second quarter of 2018 and decreased 59% as compared to \$2.1 billion in the third quarter of 2017. The decrease in originations from the second quarter of 2018 and third quarter of 2017 was primarily a result of higher interest rates. From January 2017 through the third quarter of 2018, interest rates have increased significantly from the historically low interest rate environment of previous years, causing a sharp drop in refinance volume, which has been the predominance of our retail originations. During the third quarter of 2018, the origination volume of NonQM loans increased to \$349.2 million as compared to \$306.1 million in the second quarter of 2018 and \$239.4 million in the third quarter of 2017. In the third quarter of 2018, the retail channel accounted for 29% of NonQM originations while the wholesale and correspondent channels accounted for 71% of NonQM production. In the second quarter of 2018, the retail channel accounted for 25% of NonQM originations, while the wholesale and correspondent channels accounted for 75% of NonQM production. For the third quarter of 2018, our NonQM origination volume had an average FICO of 724 and a weighted average LTV of 68%.

Non-GAAP Financial Measures

Net earnings include certain fair value adjustments, which are non-cash items and are not related to current operating results. Adjusted operating (loss) income, which excludes changes in contingent consideration and impairment of goodwill and intangible assets), is considered a non-GAAP financial measurement. Although we are required by GAAP to record these fair value adjustments, management believes adjusted operating (loss) income is more useful to discuss the ongoing and future operations of the Company, shown in the table below:
